```
Q-5 (A) Write a command for any six. [6]
   1. Display last line of file f1.
Tail-1 fl
Sed -n '$p' data
   1. Replace all occurrences of 'he' with 'she' and 'his' with 'her' in file f1.
sed -e 's/he/she/' -e 's/his/her/' fl
   1. Display only the count of duplicate words in file f1.
Sort f1 \mid uniq -dc (d to print only duplicate words, c to count)
   1. Convert file content of f1 to upper case.
tr \ '[:lower:]' \ '[:upper:]' \leq fl
awk '{ print toupper($0) }' input.txt
   1. Display files of current directory that contains 'unix' in it.
Grep -1 "unix" ./* (-1 to list file names only)
   1. Insert blank lines after each line in file f1 except last line.
Sed 'a\
' fl
   1. Display length of longest line of file f1.
wc -L fl (-L for max line length)
   1. Convert decimal number 1234 into hexadecimal.
echo "ibase=10;obase=16;1234" | bc
(B) Write commands using AWK utility. (Any three) [6]
1. Display longest word in each line of file fl.
for(i=1; i<=NF; i++)
if(length(\$i) > length(l))
⊨$i;
print 1
2. Display number of words in each line of file f1 without using NF.
count=0;
for (i = 1; i \le length(\$0); i++)
if (substr(\$0, i, 1) ~ /[[:space:]]/)
count++;
print count+1;
3. Display lines of file f1 which consists of only alphabets.
awk '/^[a-zA-Z]*$/' filename.txt
4. Display lines 5 to 10 of file f1 that do not contain 'unix'.
```

awk 'NR >= 5 && NR <= 10 && !/unix/' fl

```
{
line = \$0;
l = length(line);
rev = "";
for (i=l;i>0;i--)
{
rev=rev substr(line, i, 1);
print rev;
March-2024
Q-5 (A) Answer following using grep or sed utility (any six). [6]
   1. Display lines of file f1 that begin with 'The'.
Grep "^The" fl
Sed -n '/^The/p' fl
   1. Count total number of blank lines of file f1.
Grep -c "^$" fl
sed -n '/^$/p' filename.txt | wc -1
   1. Display the lines of file f1 that do not contain "Unix".
Grep -v "Unix" fl
Sed '/Unix/d' fl
   1. Replace all occurrences of "unix" with "linux" of file f1.
Sed 's/unix/linux/' fl
   1. Display the lines of file f1 that contain "VB.net" and/or "Asp.net".
Grep -e "VB.net" -e "Asp.net" fl
   1. Display lines of file f1 which have exactly 4 chars.
grep "[a-Z]\{4\}" fl
grep "^. . . . $" fl
sed -n '/^....$/p' fl
   1. Does not display line number 3 to 5 of file f1.
Sed '3,5d' fl
   1. Insert blank line after each line of file f1.
Sed 'a\
' fl
(B) Write commands using AWK utility. (Any three) [6]
1. Display those words of file f1 whose length are greater than 5 chars and consist of only alphabets.
for (i = 1; i \le NF; i++)
if (length($i) > 5 && $i \sim /^[a-zA-Z]+$/) {
print $i
2. Display even numbers of words in each line of file f1.
Awk 'NF%2==0' fl
```

5. Display each line of file f1 in reverse.

```
3. Count occurrences of pattern "unix" in file f1.
for (i = 1; i \le NF; i++) {
if(\hat{i} == "unix") {
c++;
} END {print c}
4. Count number of vowels in file f1.
for (i = 1; i \le length(\$0); i++) {
char = tolower(substr(\$0, i, 1))
if (char \sim /[aeiou]/) {
count++
}
END {
print count
5. Display all palindrome words in file f1.
for (i = 1; i \le NF; i++) {
word = i
rev = ""
for (j = length(word); j > 0; j--) {
rev = rev substr(word, j, 1)
if(word == rev) {
print word
November-2023
Q-4 (A) Write unix commands for following (Any 7) [7]
   1. To count number of words from line 10 to 20 of file test.txt.
Sed -n '10,20p' test.txt | wc -w
   1. Display the lines which are not starting with 2 at the beginning.
Grep −v "^2" test.txt
Sed '/^2/d' test.txt
   1. Display lines of file f1 having 1st and last same characters.
awk \ 'substr(\$0,\ 1,\ 1) == substr(\$0,\ length(\$0),\ 1)' \ filename.txt
   1. Remove repeated lines from file test.txt
sort test.txt | uniq
   1. Append dashed line after each line of file test.txt
sed 'a\
```

```
' test.txt
```

```
1. Replace all occurrences of "SYBCA" with "TYBCA" on lines 5 to 10 of file f1.
sed '5,10s/SYBCA/TYBCA/' fl
   1. To delete all special characters from file test.txt
sed 's/[^a-zA-Z0-9]//g' test.txt
   1. To run a utility Pr1 at 11:00 am
at 11:00 am Pr1
   1. Display file names from current directory whose name start with an alphabet and ends with digit.
ls | grep '^[a-zA-Z].*[0-9]$'
Q-5 (B) Write commands using AWK utility. (Any four) [4]
   1. Print even numbers of words in each line of file test.txt
for (i = 1; i \le NF; i++) {
if (i\% 2 == 0) {
printf "%s ", $i
print ""
   1. Display words whose length is greater than 6 characters and consists of only alphabets.
for (i = 1; i \le NF; i++) {
if (length(\$i) > 6 && \$i \sim /^[a-zA-Z]+\$/) {
print $i
}
   1. Print lines 6 to 12 from file text.txt
awk 'NR >= 6 && NR <= 12' text.txt
   1. Count all occurrences of pattern "TYBCA" in file test.txt
awk '/nana/ {count++} END{print count}' fl (1^{st} occurrence only)
OR
for (i = 1; i \le NF; i++) {
if ($i == "TYBCA")
count++;
} END {print count}
   1. Display lines of file f1 in uppercase
awk '{ print toupper($0) }' fl
   1. Display lines of file f1 in reverse
line = \$0
rev = ""
for (i = length(line); i > 0; i--) {
rev = rev substr(line, i, 1)
```
